

## **Saturn's close degree with lagna, on marriage compatibility**

- Renu Nagpal

Does Saturn, the most maligned planet, have a role to play in marriage-compatibility? If yes, then when and to what extent? We shall examine the role of Saturn when it is close to Lagna degree in a limited two-point area.

1. When natal Saturn is close to Lagna degree and is placed in or is aspecting the 7th house.
2. When natal Saturn is close to Lagna degree and is not associated to 7th house.

In our research group on marriage and compatibility, we have studied 272 cases. The analysis for the same is as follows:

1. Number of cases where natal Saturn is placed in or aspecting 7th house (not at lagna degree). 85  
 Number of cases of disturbed marriages. 47 55%  
 Number of cases of happy marriages. 38 45%
2. Number of cases where natal Saturn is close to lagna degree And is placed in or aspecting the 7th house. 22  
 Number of cases of disturbed marriages 15 68%  
 Number of cases of happy marriages. 7 32%
3. Number of cases where natal Saturn is not associated with 7th house but is at lagna degree. 21  
 Number of cases of disturbed marriages 15 71%  
 Number of cases of happy marriages 7 29%

From the above it can be observed that just by mere association with the 7th house, Saturn may or may not produce negative effects. However keeping other factors constant, its nearness to lagna degree is seen to play an adverse role in the area of marriage i.e it can delay or disturb marriage.

The various factors affecting the compatibility in marriage have already been outlined earlier. While we have chosen this one aspect to analyse here, it should be borne in mind that a total analysis is a must and all the factors must be kept in mind. While nearness of

Saturn's degree to that of Lagna's degree (bhava madhya) has been seen to have an important impact, but the same has to be synthesized with other positive/negative factors and the dashas which follow post marriage (say upto 15 years from marriage) period.

We have taken an assortment of cases, both happy and disturbed. A detailed analysis of the same are given below:
